### Bus Stop Petition

My name is [REDACTED] and I am chair of Lane Fox Respiratory Unit Patients Association.

We have over 500 members nationwide and I would like to add their support to the petition against the proposed island bus stop outside the main entrance to St Thomas' Hospital on Westminster Bridge.

A large number of our members are wheelchair users, or have other mobility problems, so having to watch out for cyclists before they actually get to the bus stop is not a good idea.

Also pedestrians generally should not have to cross a cycle lane, when there are many cyclists that ignore red lights.
